Summary

Full stack developer with experience building and deploying full-stack apps, real-time chat systems, and Discord bots. Skilled in Next.js, Node.js, and Python with live projects demonstrating scalable backend design and performance optimization. z

Technical Skills

Languages: Python, JavaScript, Node.js

Frontend: Next.js, React, Tailwind CSS, Motion (basic), HTMX

Backend: Express, FastAPI, Supabase, Socket.IO, WebSockets

Databases: MongoDB, PostgreSQL, Redis

DevOps: Linux (Ubuntu), SSH, Nginx Proxy Manager, Docker (basic)

Concepts: Authentication, OAuth, WebSockets, REST APIs, ORMs, Image manipulation, Deployment

Experience

Disbot Technologies (Pokémon Bot)

Discord Bot Developer (Scale: 131k+ servers, 830k+ registered users)

Contract
Remote

- Expanded gameplay features (duels, raiding, rewards) to boost user engagement and retention.
- Optimized MongoDB aggregations via refactored queries and indexing, cutting runtime by **80%**.
- Developed a high-performance **FastAPI** backend to expose bot data to the web platform.
- Implemented **Redis Pub/Sub** for multi-process cluster sync and real-time state communication.
- Engineered an automated chat support bot with LangChain and Chroma DB to resolve player queries.

Tanyavas Developers

Full Stack Developer

Freelance
Lucknow

- Built an SEO-optimized real estate platform with **Next.js** to feature plots, villas, and row house projects.
- Architected an admin panel using **Next.js Server Actions** & API routes for dynamic media and project management.
- Optimized route caching and UI responsiveness to improve page load speed and search indexability.

Projects

Chat World | Next.js, PostgreSQL (Drizzle ORM), Socket.IO

chatworld.appkit.site

- Engineered a real-time messaging pipeline with Next.js + Socket.IO for event-driven sub-200ms message delivery.
- Spearheaded Next.js Server Actions implementation, reducing client-side fetching overhead by 40% and improving page load speeds by 35%
- Integrated the HTML5 Geolocation API to compute and serve localized chat rooms in real time.

Memepost | EJS, HTMX, Express, MongoDB (Mongoose), Nodemailer

memepost.appkit.site

- Built a meme-sharing platform with image uploads, comments, and secure access controls.
- Architected a hyper-lightweight frontend using HTMX and Express to swap HTML fragments server-side, reducing client-side JavaScript bundle size by 80%
- Implemented JWT auth via HttpOnly cookies and Gmail OTP verification using Nodemailer.

Portfolio | Next.js, PostgreSQL (Drizzle ORM), Auth.js, Jodit Editor

suryansh.me

- Integrated OAuth 2.0 protocols via Auth.js to establish secure Google authentication and persistent session management.
- Architected a serverless-compatible live chat feature using optimized HTTP short-polling to align with Vercel's stateless infrastructure, eliminating the need for a persistent WebSocket server and reducing architecture complexity.

Achievements

Techfest, IIT Bombay (2023): Participated in the **Hack-AI** (online rounds) and secured **2nd**, qualifying for the final round in **Mumbai**.

Education

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology in Computer Science

2026

Lucknow, Uttar Pradesh
